

INTRODUCTION

The **ScienceDirect TOP25 Hottest Articles** is a **free** quarterly service from ScienceDirect. When you subscribe to the **ScienceDirect TOP25**, you'll receive an e-mail every three months listing the ScienceDirect users' 25 most frequently downloaded journal articles, from any selected journal among more than 2,000 titles in the ScienceDirect database, or from any of 24 subject areas.

Now you can keep track of the latest trends in your speciality and find out what your colleagues are reading. A simple click on any of the listed articles will take you to the journal abstract, and of course, you have the option to download any article straight to your desktop, depending on your access rights.

Read more about [how the TOP25 is generated](#) and what it reflects.

Journal:

With these drop-down menus, the ScienceDirect TOP25 Hottest Articles are selected. Please refine your selection if necessary. To see the overall TOP25 within a certain subject area or journal, please select 'all subjects' or 'all journals' from the drop-down menus.

TOP25 articles within the journal: Engineering Analysis with Boundary Elements

1. [A multidomain boundary element method for unsteady laminar flow using stream function-vorticity equations](#)
Engineering Analysis with Boundary Elements, Volume 29, Issue 1, Pages 1-14
2. [Application of the Laplace transform dual reciprocity boundary element method in the modelling of laser heat treatments](#)
Engineering Analysis with Boundary Elements, Volume 29, Issue 2, Pages 126-135
3. [Development of a 3D numerical wave tank for modeling tsunami generation by underwater landslides](#)
Engineering Analysis with Boundary Elements, Volume 26, Issue 4, Pages 301-313

Pages 13-20

- [Asymptotically exact boundary elements for corner and re-entrant problems](#)
Engineering Analysis with Boundary Elements, Volume 29, Issue 2, Pages 126-135
- [Modelling and characterisation of the mechanical behaviour of NiTi alloys](#)
Engineering Analysis with Boundary Elements, Volume 29, Issue 1, Pages 1-14
- [Solutions of 2D contact problems by subdomain inequality and MLPG method with radial basis functions](#)
Engineering Analysis with Boundary Elements, Volume 29, Issue 2, Pages 126-135
- [A boundary element method for conjugate heat transfer problems](#)
Engineering Analysis with Boundary Elements, Volume 29, Issue 2, Pages 126-135
- [A boundary element method for two-dimensional plane compressible fluid flow](#)
Engineering Analysis with Boundary Elements, Volume 29, Issue 1, Pages 1-14
- [Details and modeling accuracy requirements for compressed current cathodic protection system](#)
Engineering Analysis with Boundary Elements, Volume 29, Issue 1, Pages 1-14
10. [Genetic algorithms for inverse cathodic protection problems](#)
Engineering Analysis with Boundary Elements, Volume 28, Issue 3, Pages 267-277
11. [Electrostatic BEM for MEMS with thin conducting plates and](#)

shells

Engineering Analysis with Boundary Elements, Volume 28, Issue 12, Pages 1427-1435

12. **Eigensolutions of multiply connected membranes using the method of fundamental solutions**
Engineering Analysis with Boundary Elements, Volume 29, Issue 2, Pages 166-174
13. **A meshless local natural neighbour interpolation method for stress analysis of solids**
Engineering Analysis with Boundary Elements, Volume 28, Issue 6, Pages 607-613
14. **Particular solutions of Laplace's equations on polygons and new models involving mild singularities**
Engineering Analysis with Boundary Elements, Volume 29, Issue 1, Pages 59-75
15. **Boundary integral equation for inclusion and cavity shape sensitivity in harmonic elastodynamics**
Engineering Analysis with Boundary Elements, Volume 29, Issue 1, Pages 77-91
16. **Boundary meshfree methods based on the boundary point interpolation methods**
Engineering Analysis with Boundary Elements, Volume 28, Issue 5, Pages 475-487
17. **Cartesian grid methods using radial basis functions for solving Poisson, Helmholtz, and diffusion-convection equations**
Engineering Analysis with Boundary Elements, Volume 28, Issue 12, Pages 1417-1425
18. **RBF-based meshless methods for 2D elastostatic problems**
Engineering Analysis with Boundary Elements, Volume 28, Issue 10, Pages 1271-1281
19. **A fundamental solution method for inverse heat conduction problem**
Engineering Analysis with Boundary Elements, Volume 28, Issue 5, Pages 489-495
20. **Iterative schemes for the solution of system of equations arising from the DRM in multi domain approach, and a comparative analysis of the performance of two different radial basis functions used in the interpolation**
Engineering Analysis with Boundary Elements, Volume 29, Issue 2, Pages 107-125
21. **Heritage and early history of the boundary element method**
Engineering Analysis with Boundary Elements, Volume 29, Issue 3, Pages 268-302
22. **Symmetric Galerkin boundary element computation of T-stress and stress intensity factors for mixed-mode cracks by the interaction integral method**
Engineering Analysis with Boundary Elements, Volume 28, Issue 11, Pages 1335-1350
23. **A mixed BEM-FEM formulation for layered soil-superstructure interaction**
Engineering Analysis with Boundary Elements, Volume 28, Issue 9, Pages 1111-1121
24. **Retrieval of multidimensional heat transfer coefficient distributions using an inverse BEM-based regularized algorithm: numerical and experimental results**
Engineering Analysis with Boundary Elements, Volume 29, Issue 2, Pages 150-160
25. **Three-dimensional oscillations of rising bubbles**
Engineering Analysis with Boundary Elements, Volume 28, Issue 4, Pages 315-323
